Table A.50: Hours Authorized for Purchase as Recorded in CMIPS in the Month Previous to the Last Assessment: Claimants and IHSS Consumers Who Received a Cut in Hours Notice, Reassessments Only 129
Table A.51: Number of HTG Tasks Authorized: Claimants and IHSS Consumers, Initial Assessments Only 130
Table A.52: Number of HTG Tasks Authorized as Recorded in CMIPS in the Month Previous to the Last Assessment: Claimants and IHSS Consumers, Reassessments Only 130

Table A.53: Number of HTG Tasks Authorized as Recorded in CMIPS in the Month Previous to the Last Assessment: Claimants with a Cut in Hours Notice and IHSS Consumers, Reassessments Only 131

PLEASE NOTE THE FOLLOWING WHEN REVIEWING THE APPENDIX TABLES A.1 AND A.2:

- The term ***mean difference*** in the table means the difference is the number of average minutes in the post-HTG group minus the number of average minutes in the pre-HTG group.
    - A "-" sign means the average number of minutes decreased while a number with no sign in front of it means the number of minutes increased from the pre-HTG to the post-HTG period.
- For the ***Summary of Differences in Minutes For All HTG Tasks*** county breakout tables the following apply:
- Bolded county names represent counties which had an overall increase for all HTG tasks.
    - Bolded italic numbers represent differentials based on a sample of less than 50 cases in either the pre- or post-implementation period. These numbers should be interpreted very cautiously, as changes in a small number of cases may distort the overall increase or decrease in assessed minutes.
- The unshaded row for each county reflects the number of cases in the pre-HTG and post-HTG group (pre/post).
- When viewing the overall county average increases or decreases, be mindful that small counties with just a few assessments are more impacted by a few cases that change substantially than large counties with hundreds of cases assessed. Some counties had total case sizes of less than 50; some counties had less than 50 cases in specific categories.
- Tasks for which there were no cases in either the pre- or post-implementation time period are indicated with "n/a."

[a]The term mean difference in the table means the difference is the number of average minutes in the post-HTG group minus the number of average minutes in the pre-HTG group. A "-" sign means the average number of minutes decreased while a number with no sign in front of it means the number of minutes increased from the pre-HTG to the post-HTG period.
[b]For the *Summary of Differences in Minutes For All HTG Tasks* county breakout tables, bolded county names represent counties which had an overall increase for all HTG tasks.
[c]Bolded italic numbers represent differentials based on a sample of less than 50 cases in either the pre- or post-implementation period. [a]The term mean difference in the table means the difference is the number of average minutes in the post-HTG group minus the number of average minutes in the pre-HTG group. A "-" sign means the average number of minutes decreased while a number with no sign in front of it means the number of minutes increased from the pre-HTG to the post-HTG period.
[b]For the *Summary of Differences in Minutes For All HTG Tasks* county breakout tables, bolded county names represent counties which had an overall increase for all HTG tasks.
[c]Bolded italic numbers represent differentials based on a sample of less than 50 cases in either the pre- or post-implementation period. These numbers should be interpreted very cautiously, as changes in a small number of cases may distort the overall increase or decrease in assessed minutes. When viewing the overall county average increases or decreases, be mindful that small counties with just a few assessments are more impacted by a few cases that change substantially than large counties with hundreds of cases assessed.
[d]Tasks for which there were no cases in either the pre- or post-implementation time period are indicated with "n/a."
