Payment Instructions

This award will be paid through the Payment Management System (PMS), <https://pms.psc.gov>.

The Program Support Center (PSC) is a non-appropriated agency hosted by the U.S. Department of Health and Human Services (HHS). PSC developed the Payment Management System (PMS) as a secure, online grants payment platform which provides awarding agency and grant recipient customers with efficient grant and grant-like payments, cash management, and personal grant accounting support services.

PMS leverages efficient business processes, state-of-the-art information technology, E-Government initiatives, and business expertise to build a critical link in the operation of federal financial assistance programs. The system receives payment requests, transmits the payment to either the Federal Reserve Bank or the U.S. Treasury for deposit into the grantee's bank account, and records the payment transactions and corresponding disbursements to the appropriate account(s).

The Payment Management System (PMS) is a tool to help grant recipients draw down funds and file the Federal Financial Report (FFR).

For states, payments are governed by Treasury-State CMIA agreements and default procedures codified at 31 CFR part 205 and TFM 4A-2000 Overall Disbursing Rules for All Federal Agencies.

For non-Federal entities other than states, payments methods must minimize the time elapsing between the transfer of funds from the United States Treasury or the pass-through entity and the disbursement by the non-Federal entity whether the payment is made by electronic funds transfer, or issuance or redemption of checks, warrants, or payment by other means.

In accordance with Department of Treasury regulations, federal cash MUST BE DRAWN SOLELY TO ACCOMMODATE YOUR IMMEDIATE NEEDS ON AN "AS NEEDED" BASIS ONLY, and must not be held in excess of three (3) working days. The Department of Treasury issued regulations governing the flow of federal cash to recipient organizations. These regulations are intended to ensure that federal cash is disbursed from U.S. Treasury coffers only when the recipient needs cash for payment purposes. The regulations minimize the negative impact of federal cash withdrawals on the public debt and related financing costs to the Federal Government. At no time, therefore, should cash be requested to cover unliquidated encumbrances, obligations, or accrued expenditures until actual program disbursements are anticipated. {Reference Circular 1075 & 1084}

Grant Recipients can find the PMS User Guide and Training on the PMS website, <https://pms.psc.gov/training/pms-user-guide.html>.

Preschool Development Grant Birth through Five Renewal Grant Performance Progress Report

About this Performance Progress Report

The purpose of the Performance Progress Report (PPR) is to help the Administration for Children and Families (ACF) in consultation with the Department of Education (ED) assess the progress of Preschool Development Grant Birth through Five (PDG B-5) Renewal Grantees. This PPR is tailored to the specific goals and objectives of the PDG B-5 Renewal Grants and will allow ACF to collect useful information from grantees in a uniform and systematic manner. This PPR will be collected annually and supplement the standard ACF required PPR.

Time Burden

This data collection is expected to require an average of 3 hours per response.

Instructions

The Performance Progress Report is collected on an annual basis and is to be submitted by 1/31.

For more information about program reporting requirements, refer to Funding Opportunity Announcement (FOA) HHS-2019-ACF-OCC-TP-1567.

Compliance

Responses will be kept private to the extent permitted by law.

THE PAPERWORK REDUCTION ACT OF 1995 (Pub. L. 104-13): Public reporting burden for this collection of information is estimated to average 3 hours per response, including time for reviewing instructions, gathering and maintaining the data needed, and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Preschool Development Grant Birth through Five (PDG B-5) Renewal Grantees are engaged in a wide array of grant activities, have varied programs in their mixed delivery systems (MDS), and have differing data capacities and capabilities. In addition, each grantee is working toward achieving unique goals and objectives. There may be questions in this progress report that are not directly applicable to each grantee or that each grantee may not have the requisite information/data to currently answer. If you do not respond to a question, describe why it has been left blank and describe any planned activities that will enable completion of a response to the question in future performance progress reports.

Section A

[illegible]

The first step in the process of identifying a problem is to recognize that a problem exists. This is often done by comparing current performance with a desired state or goal. Once a problem is identified, the next step is to define the problem more precisely. This involves determining the scope of the problem, the resources available, and the constraints that may be affecting the problem. The third step is to analyze the problem. This involves identifying the causes of the problem and the relationships between the different elements of the problem. The fourth step is to develop a solution. This involves identifying the different options available and evaluating the pros and cons of each option. The fifth step is to implement the solution. This involves putting the chosen solution into action and monitoring its progress. The sixth step is to evaluate the results. This involves comparing the actual results with the desired results and determining whether the problem has been solved.
