Report to the Joint Legislative Budget Committee: Data to Facilitate Legislative Review of the Outcomes of the Dual Agency Program and Payment Changes. February 2008

California Department of Social Services Department of Developmental Services DEPARTMENT OF SOCIAL SERVICES 744 P Street, Sacramento, CA 95814

The Honorable Denise Moreno Ducheny, Chair Joint Legislative Budget Committee 1020 N Street, Room 553 Sacramento, CA 95814

Attention: Jody Martin, Consultant

Dear Senator Moreno Ducheny:

Attached please find the report titled "Report to the Joint Legislative Budget Committee: Data to Facilitate Legislative Review of the Outcomes of the Dual Agency Program and Payment Changes." This report pertains to "dual agency" children, i.e., children who are both consumers of regional center services for individuals with a developmental disability and recipients of Aid to Families with Dependent Children-Foster Care (AFDC-FC) or Adoption Assistance Program (AAP) benefits. The report is required by Welfare and Institutions Code (WIC) Section 11464(h), as enacted by Senate Bill (SB) 84 (Chapter 177, Statutes of 2007), which was signed into law by Governor Schwarzenegger on August 24, 2007. The California Department of Social Services (CDSS) and the Department of Developmental Services (DDS) are jointly responsible for, and committed to, semi-annually providing the report specified in SB 84. CDSS and DDS have worked together to develop the specific data requirements, the data files to be shared or merged, and the format for this report.

This is the first of the required semi-annual reports to be submitted to the Legislature. CDSS and DDS will continue to collaborate to ensure the successful implementation of this important legislation and continue to update the Joint Legislative Budget Committee on our progress.

If you have any questions, please do not hesitate to call John Wagner at (916) 657-2598, Terri Delgadillo at (916) 654-1987, Patti Huston, CDSS Office of Legislation, at (916) 657-3790, or Mary Lee Pennington, DDS Office of Legislation, at (916) 654-1844.

Sincerely,

JOHN A. WAGNER Director California Department of Social Services TERRI DELGADILLO Director Department of Developmental Services

Enclosure

Ms. Ana Matosantos, Office of Governor Arnold Schwarzenegger

## LEGISLATIVE MANDATE

Senate Bill 84, Chapter 177, Statutes of 2007 requires the California Department of Social Services and the Department of Developmental Services to semiannually submit to the Joint Legislative Budget Committee a report to facilitate review of the outcomes of the rate structure changes for rates paid for children who are both consumers of regional center services for individuals with a developmental disability and recipients of Aid to Families with Dependent Children–Foster Care or the Adoption Assistance Program.

# EXECUTIVE SUMMARY

Senate Bill (SB) 84, Chapter 177, Statutes of 2007, provides a new rate setting process and rate structure for children served by the California Department of Social Services (CDSS) and the Department of Developmental Services (DDS), "dual agencies," which will:

- establish new rates to be paid for 24-hour, out-of-home care and supervision provided to "dual agency" children;
- ensure that the rates established for the targeted population are consistent;
- clarify the roles and responsibilities of CDSS and DDS;
- preserve previous rates established prior to the effective date of the change;
- facilitate finalization of adoptions;
- ensure continuation of service provisions by the regional centers; and
- provide statewide consistency for program administration.

## Legislative Intent

The Legislature declared in SB 84 that children who are consumers of regional center services and also receiving Aid to Families with Dependent Children-Foster Care (AFDC-FC) or Adoption Assistance Program (AAP) benefits have special needs that can require care and supervision beyond that typically provided to children in foster care. The Legislature further stated the following:

- \$2,006 is an enhanced rate, which is higher than the rate other children with medical and significant special needs receive.
- \$1,000 supplemental rate is for children whose care and supervision needs are so extraordinary that they cannot be addressed within the enhanced \$2,006 rate. For these limited circumstances, objective criteria for determining eligibility and the level of the supplement are being developed by CDSS and DDS, in consultation with a broad group of stakeholders.

## **Report Requirements**

SB 84, Chapter 177, Statutes of 2007, requires CDSS and DDS to semiannually provide the following data to the Joint Legislative Budget Committee to facilitate review of the outcomes of the rate structure changes made to the AFDC-FC and the AAP:

• The number of, and services provided to, children who are consumers of regional center services and who are receiving AAP or AFDC-FC (dual agency children), broken out by children receiving the \$2,006 rate, the \$2,006 rate with supplement, and the \$898 rate which is for those children under the age of three who are receiving services under California's Early Start Intervention Services Act.

- A comparison of services provided to these children and similar children who are regional center consumers who do not receive AFDC-FC or AAP benefits, broken out by children receiving the \$2,006 rate, the \$2,006 rate with supplement, and the \$898 rate.
- The number and nature of appeals filed regarding services provided or secured by regional centers for these children broken out by children receiving the \$2,006 rate, the \$2,006 rate with supplement, and the \$898 rate.
- The number of these children who are adopted before and after the effective date, broken out by children receiving the \$2,006 rate, the \$2,006 rate with supplement, and the \$898 rate.
- The number and levels of supplements requested.
- The number of supplements authorized upon caregiver request.
- The number of supplements denied after request but authorized upon appeal.

## Report Content

SB 84 mandates new reporting requirements for CDSS and DDS, with the information listed above to be provided to the Legislature on a semiannual basis in March and October of each year. To ensure accuracy, much of the data in this report requires data sharing, matching, and analysis between CDSS and DDS. The source of information provided by CDSS in this report is the Child Welfare Services/Case Management System (CWS/CMS), the statewide automation system that supports the child welfare services program. The DDS data was drawn from the Uniform Fiscal System (UFS) and the Client Diagnostic and Evaluation Report (CDER). The regional center services only population in this report consists of children residing in the home of a parent or guardian and for purposes of this report are considered comparative to those in AAP and Foster Care.

Some of the data required by SB 84 is not available for this report. The Departments are unable to provide information regarding the number and levels of rate supplements requested, the number of supplements authorized upon request and the number denied upon request but subsequently authorized after appeal. Reporting protocols and All County Letters (ACLs) for this information are currently being developed. Timelines associated with data protocol development, implementation, and subsequent access to the individual county data precludes this data from being reported until the October 2008 report. Additionally, because the finalization of adoptions often takes up to 18 months, the data reported for the first 24 months following the enactment of SB 84 will not provide complete information about the possible impact to adoptions as a result of the new rate structure.

Future reports will provide the data required by SB 84, as the information becomes available. Appendices 19 - 30 reflect the information that will be contained in future reports. Caution should be used related to interpretation of the data provided in this report until more complete information is available. All data in this report will serve as

baseline information about dual agency children for future reporting as it represents the total matched population up to December 31, 2006.

## **Report Findings**

This report yields the following findings of interest:

- Baseline data shows approximately 2,200 adoptions of dual agency children have been recorded in the adoptions data file; of those, approximately 250 were adopted during the period July 1, 2006 to December 31, 2006. Of these, roughly three-fourths received payments below the \$2,006 and \$898 rates specified in SB 84 while the remaining one-quarter received rates above those specified in SB 84. SB 84 brings those with payments below \$2,006 up to \$2,006, and maintains the rates that are higher than \$2,006. Some children may also be eligible for a supplemental rate of up to \$1,000. Please refer to "Rate History" on page 5 for a discussion of rates as established by SB 84.
- Over 2,100 children in foster care were identified to be dual agency children. Approximately three-quarters of these children were receiving less than the new payment levels of \$2,006 or \$898, over one-tenth were receiving average payment levels above the rates, and the remainder were missing the cost information necessary to determine their payment levels. (See note in preceding bullet.)
- Dual agency children and children who are only regional center consumers receive, on average, similar amounts of respite services.
- Approximately half of the children in AAP or Foster Care receive services purchased by the regional centers, while two-thirds of the sample of similar children with developmental disabilities living with their biological families receive regional center funded services. The single agency children are not receiving AAP or Foster Care payments; however, it should be noted that these payments are intended to meet the care and supervision needs of children, not for service needs.
- Children in the sample population served only by the regional center, on average, receive up to 57 percent more in regional center funding for purchased services than those children served by both systems. The single agency children are not receiving AAP or Foster Care payments (as noted above, however, AAP and Foster Care payments are intended to meet the care and supervision needs of children, not services needs).
- A few children in AAP or in Foster Care also receive residential services, adult day program services, and supported living services purchased by the regional centers. This is due to two key factors:
  - 1. Children may be served by both systems until the age of 21 and may benefit from residential and/or adult day program services as part of their transition into adulthood.
  - 2. Both foster families and adoptive families are permitted to temporarily place children into residential care with the expectation that an eventual return to the family may result in a permanent placement.

# BACKGROUND

#### Foster Care

Foster Care is the provision of services designed to protect and assist those children who cannot remain in their homes. In the foster care program current placement options include family homes (relative or foster family homes), certified homes of foster family agencies, small family homes and group homes. Foster care maintenance payments are funded through the AFDC-FC program. These payments provide for the cost of food, clothing, shelter, daily supervision, school supplies, a child's personal incidentals and reasonable travel, including travel to the child's home for visitation.

#### **Adoption**

Adoption is a legal process which permanently gives adopting parents the same parental rights as biological parents. Adoption is the acceptance of a child into a family's home as a permanent family member.

Foster children of all ages are in the child welfare system awaiting permanent homes. Parental rights to children awaiting adoption have been terminated by court order. The county or the CDSS selects permanent homes in which to make an adoptive placement. Potential adoptive parents are informed of special needs or significant problems which the child may have or encounter. Information provided by the child's caseworker depicts the child and describes the strengths, challenges and adjustments the child may have once placed with an adoptive family.

#### Adoption Assistance Program

Federal legislation established the AAP in recognition that adoptive parents often experience financial difficulty meeting the needs of children who have special challenges. Some counties provide their own adoption services while others rely on CDSS Adoptions District Offices to determine eligibility for participation in the program and to negotiate a signed adoption assistance agreement with the adoptive parents that stipulates the need for, and the amount of, the AAP benefits. The signed agreement must specify the duration of the assistance and a reassessment date that cannot exceed two years. The financial payment is limited to the amount that the child would have received as an AFDC-FC payment in foster care and is based upon the needs of the child and the circumstances of the adoptive family. The child is also eligible for Medi-Cal benefits. An adopted child who receives AAP benefits from California may move out of state and continue to receive monthly AAP payments.

## Rate History

Title IV-E of the federal Social Security Act delineates the requirements for the Aid to Families with Dependent Children-Foster Care (AFDC-FC) Program at 42 U.S.C. Sections 671-672. AFDC-FC payments address the cost of providing care and supervision, as defined at 42 U.S.C. Section 675 (4)(A), to children placed out of home. State law at Welfare and Institutions Code (WIC) Section 11460 governs state implementation of the AFDC-FC Program by CDSS and county welfare departments. State regulations are at CDSS Manual of Policies and Procedures Section 11-401 and Section 45-100 et seq.

The Adoption Assistance and Child Welfare Act of 1980 (42 U.S.C. Sections 670-674) established the federal Adoption Assistance Program (AAP). State law at WIC, Sections 16115 – 16123 (2001) governs state implementation of the AAP by CDSS and county welfare agencies. CDSS promulgated state regulations at Title 22, California Code of Regulations, Sections 35325 - 35352.3. The AAP benefit amount is limited to what would have been paid for the child's out-of-home foster care. The rate was based on the cost of care and supervision and when appropriate, the cost of additional services given to persons with developmental disabilities in out-of-home placements. For some children receiving AFDC-FC payments or AAP benefits and services from regional centers for persons with developmental disabilities (i.e., dual agency children), benefit amounts were determined by using Alternative Residential Model (ARM) rates established by DDS.

SB 84, Chapter 177, Statutes of 2007, established a new rate-setting model for 24-hour out-of-home care and supervision of dual agency children effective July 1, 2007, which is no longer tied to ARM rates. The new model, as specified in WIC Section 11464 (a) -(f), sets an enhanced rate of \$2,006 per child per month for the care and supervision of dual agency children. The county may authorize a supplement of up to \$1,000 to the rate for children three years of age and older if it determines the child has extraordinary care and supervision needs that cannot be met within the \$2,006 rate. The rate for children receiving regional center services under the California Early Start Intervention Services Act and AFDC-FC or AAP benefits is \$898 per month. For children under three years of age who have been determined to be eligible for regional center services, the enhanced rate of \$2,006 applies. The county may authorize a supplement of up to \$1,000 for extraordinary care and supervision. In these limited circumstances, the Legislature stated its intent in SB 84 that this rate supplement is authorized for children with extraordinary care and supervision needs. For children receiving either rate, regional centers will separately purchase or secure the services that are contained in the child's Individualized Family Service Plan (IFSP) or Individual Program Plan (IPP).

# DATA REPORT

#### California Department of Social Services

Table 1 and Table 2 (Appendix 1) describe dual agency consumers in foster care in December 2006 and average grant information. This data serves as a baseline for future reports.

Table 3 and Table 4 (Appendix 2) describe the number of dual agency consumers who have had finalized adoptions in the last six months of 2006. This information serves as a baseline for future reports.

Table 5 and Table 6 (Appendix 3) describe the total number of dual agency consumers who have had a finalized adoption by December 31, 2006.

Table 7 and Table 8 (Appendix 4) will describe the number of dual agency consumers who have had adoptions finalized by June 30, 2007. This information will be available for the March 2008 report.

Table 9 (Appendix 5) will provide information about the number of supplements requested, authorized and denied. Protocols for collecting, reporting, and analyzing this information are under development. This information will be available for the October 2008 report.

Table 10 (Appendix 5) will provide information about appeals filed, denied and authorized after appeal. Protocols for collecting, reporting, and analyzing this information are under development. This information will be available for the October 2008 report.

#### **Department of Developmental Services**

DDS Table 4a (Appendix 7) summarizes subsequent Tables 4b – 4j.Respite services for all three groups (AAP, FC, DDS-only) exhibited the largest total expenditures during the period and the average purchase of services (POS) was consistent across all three groups. Residential Services and Supported Living & Related Services were noticeably higher in average for the DDS-only population. When comparing these services, consideration must be given to the county benefits and other agency services the FC and APP populations may receive and that are not included in the average rates for the FC and AAP populations in the chart. It should also be noted that the FC and APP populations may be receiving these services because:

1. they may be served by CDSS and DDS until the age of 21 and may benefit from these services as part of transition into adulthood; and/or

2. both foster and adoptive families are permitted to temporarily place children into residential care with the expectation that an eventual return to the family may result in a permanent placement.

Finally, four services for which both AAP and FC incurred either low or no expenditures during the period – Work Activity Program, Supported Employment Program, Environmental & Vehicle Modifications, and Mobility Training – were also notably the lowest for the DDS-only comparable group.

DDS Table 4b (Appendix 8) demonstrates that a majority of each comparison group, with autism only, accessed Respite and Behavioral services more than other service categories – 48 and 41 percent respectively of AAP consumers, 37 and 32 percent respectively of FC consumers, and 51 and 39 percent respectively of DDS-only consumers. The AAP and FC populations in DDS Tables 4c and 4d (Appendices 9 - 10), consumers with cerebral palsy and epilepsy only, were too small during the period for any significant analysis.

The AAP population in DDS Table 4e (Appendix 11), mental retardation only comparison group, had larger average POS for the group total than the DDS-only group. The greatest difference in average POS between the AAP/FC groups and the DDS-only group was in Social/Recreational Activities. The average for AAP consumers was \$3,774, \$4,540 for FC consumers, and \$2,546 for DDS-only consumers. Services accessed by all three groups were highest for respite, but variation between the groups in all other services are noted.

The major services accessed by consumers with other developmental disabilities and multiple developmental disabilities, DDS Tables 4f and 4g (Appendices 12 - 13) respectively, were Respite and Behavioral. These services accounted for approximately 49 percent in Table 4f and 58 percent in Table 4g of the total POS expenditures for all of the comparative groups.

The data in DDS Tables 4h through 4j (Appendices 14 - 16), which are for consumers that DDS identified by "Other CDER Factors" – Medical, Developmental, and Behavioral Challenges – do not differ significantly from the data of those consumers with developmental disabilities highlighted in Tables 4a through 4i. Respite and Behavioral, services were among two of the major services provided for each comparative group. FC consumers with developmental and behavioral challenges (Tables 4i and 4j) accessed Supplemental Program Support and Social/Recreational activities at a higher average cost than both the AAP and DDS-only populations. For the DDS-only and AAP groups, Respite, Behavioral, and Medical Care services accounted for a greater portion of total POS expenditures, 67 percent and 69 percent respectively, while for FC consumers the services only represented 43 percent of total expenditures.

For consumers ages 0-2, DDS Table 5 (Appendix 17), Infant Program and Medical Care & Services were the most accessed services by all three comparative groups during the reporting period. Combined, 57 percent of the AAP consumers, 60 percent of the FC

consumers, and 62 percent of the DDS-only consumers used these two services. This is appropriate for these consumers as early intervention is the priority.

DDS Table 6 (Appendix 18) provides the results of fair hearings during the reporting period that were requested as a result of rate determinations by regional centers. Out of the seven hearings requested, five were either withdrawn or resolved before the fair hearing and two were granted to the consumer by the administrative law judge.

APPENDICES
